

7.SUB QUERIES

SELECT * FROM `bank` WHERE Cust_Name IN (SELECT Cust_Name FROM bank WHERE cus_Branch = 'chennai');

The screenshot shows the phpMyAdmin web interface. The left sidebar displays the database structure with 'dbms' selected. The main panel shows the 'bank' table with the following data:

S_No	Cust_Name	Acc_No	Balance	cus_Branch
1	praveen	1234	34000	chennai
4	rahu	1258	6000	chennai
5	ramya	1259	70000	chennai
8	kishore	366	6000	chennai

The query results operations bar at the bottom includes buttons for Print, Copy to clipboard, Export, Display chart, and Create view.
